

Environmental Policy

We recognise that our operations have an effect on the local, regional and global environment. As a consequence of this, BusinessNAV management are committed to continuous improvements in environmental performance and the prevention of pollution.

Environmental regulations, laws and codes of practice will be regarded as setting the minimum standards of environmental performance. We will implement our policies through a coordinated environmental management system. The company will endeavour to implement environmentally safe and sustainable energy sources to meet our needs. We will invest in improved energy efficiency of products we use and sell.

BusinessNAV considers the environmental impacts of its products and services at all stages of their life cycle - from initial design and development, to end customer use. We will seek to address our impact on the environment through the adoption of a sustainable procurement policy. We will conserve resources through efficient use and careful planning.

The company maintains that a primary part of its corporate environmental strategy is sustainable waste management and as such recognises its responsibilities to recycle materials wherever possible. We will minimize waste, especially hazardous waste, and whenever possible recycle materials. We will dispose of all waste through safe and responsible methods. We will work with our suppliers to ensure they recognise and reduce the environmental impact of their products and transportation. We will implement our policies through guidelines and training.

The company will set environmental targets and goals designed to improve our environmental performance. Through coordinating travel and delivery schedules this company seeks to realise the dual benefits of reduced fuel consumption and lower exhaust emissions where possible.

If you have any questions about our environmental policy and approach, please email help@businessnav.com .
